

# IPAX High Performance ORANGE ASPHALT RELEASE

IPAX High Performance ORANGE ASPHALT RELEASE is a revolutionary, environmentally safe product that prevents all grades of asphalt from adhering to paving equipment and trucks. High Performance ORANGE ASPHALT RELEASE has no effect on the quality or hardness of the finished pavement.

IPAX High Performance Orange Asphalt Release is a highly concentrated, biodegradable citrus solvent specially blended to replace hazardous diesel fuel in paving and asphalt cleaning applications. It prevents asphalt sticking and build-up on truck beds, paving equipment, and tools.

Made with a non-petroleum base, IPAX High Performance Asphalt Release will not adversely affect the asphalt mix as with many solvent products. When mixed with water in a high sheer contact mixer/dispenser, the product will form an inverse emulsion with the consistency of highly dense foam. This emulsion leaves an extremely slippery film, which prevents the hot asphalt from adhering tightly to the metallic surfaces. The product is safe on glass, painted and all metal surfaces and when used as directed, will have no effect on the asphalt mixes.

## APPLICATIONS AND DILUTIONS

### PAVERS. ROLLERS. COMPACTORS & SHOVELS:

Use straight or dilute one part of Orange Asphalt Release with up to five parts water, depending upon grade of asphalt.

**TRUCKS:** Dilute one part of Orange Asphalt Release with from two to five parts water, depending upon grade of asphalt.

## FEATURES AND BENEFITS

- Bio-Degradable
- Environmentally Friendly
- Non-Petroleum
- No damage to Road Surfaces
- Prevents Sticking
- Reduces Labor and Loss
- Cleans Equipment and Tools
- Will Not Harm Paint or Polished Aluminum

IPAX High Performance Orange Asphalt Release can also be used to clean heavy grease and oil in industrial and manufacturing applications. We recommend that the product be diluted for such applications:

- For Heavy Grease, dilute 1:1 (128 oz/gallon)
- For Heavy Soil, dilute 4:1 (32 oz/gallon)
- For Medium Soil, dilute 8:1 (16 oz/gallon)
